About these special nappies, in their words:

Huggies believes in leaving no baby unhugged, so this inspired us to create our tiniest nappy yet – the Nano Premmie Nappy.

Specially designed and developed in partnership with neonatal nurses, after extensive research and interviews with medical

professionals and neonatal therapists, we designed a nappy for premature babies under 900 grams - providing the optimal fit for healthy growth development. Our Nano Premmie Nappies allow premies to grow in comfort while accommodating for medical leads and tubes in the incubator.

Our Nano Premmie Nappy also features specially-sized fasteners and a narrow pad for more flexibility.
